PROJECTS

E-COMERCE WEBSITE

This website is made using React library, featuring a dynamic and responsive design. It includes sections for browsing products, adding items to the cart, and a streamlined checkout process. The project demonstrates my skills in React, state management, and creating user-friendly interfaces.

MOVIE WEBSITE

This website is made using React ,tailwind ,Gsap and integrated it with the TMDB API to fetch and display real-time movie data. The website includes features like trending movies, genre-based browsing, and a search bar, offering an interactive and responsive user experience.

CERTIFICATION

Web development bootcamp(html,css ,javascript) in college.

Certification in internship of web development in Compsoft Technologies.

Certication of completion of SQL course (Scaler).

SOFT SKILL

Strong problem solving skill.

Good communication and documentation skill.

Team collaboration in project management.

INTERESTS

Front-end development.

Open source contribution.

SQL/Java development.
